

DynamiQ™ mTilt

Height Adjustable Series

The DynamiQ™ mTilt is height adjustable tilting mobile cart with motorized height adjustable capabilities. The double-column design provides the stability needed to work with large interactive touchscreens up to 75".

The wired remote controller may be placed at a convenient and easy-to-reach location, allowing the user to adjust the height of the screen safely and quietly. The 26" travel will guarantee full screen access for all users, while the 90-degree tilt feature will allow multiple users to access the screen at the same time. The motorized stand has an anti-collision feature to prevent accidental pinching, when the system is moving and senses an obstruction it will stop and retreat. In its lowest position, the monitor allows easy access for users in wheelchairs.

A lockbox is located on the back of the VESA mounting box, which safely stores the electric controls. The lockbox also may be used for a mini PC or other small equipment.

FEATURES

- Motorized height adjustability
- Wired remote-control, no battery needed
- Fast height adjust motor at 1.5" per second travel speed
- Lock-box for safe electronic control storage
- 90-degree tilt feature
