

TEAM Table Series

Collaborative Furniture for Today's Technology

How to Select the Perfect Collaboration Furniture

Today's mobile workforce requires companies to rethink their current meeting spaces. Boardrooms, huddle spaces and meeting nooks provide different needs on how the room is used, and how employees will interact. As you design new meeting spaces, or renovate existing offices, the following tips can help you select the right furniture for the space.

Purpose of the Room

Before you begin, identify how the room will be used. Is the room for your company's top executives, small team meetings or impromptu employee brainstorming? Will people be sitting, walking around or standing? Do you want a formal or informal environment?

Size of the Room

When planning the furniture for a meeting space, the size of the room is important. Generally, you should allow a minimum of 42 inches between the edge of the conference table and the wall to provide room for people to roll back their chairs. In addition, you want to make sure there is adequate space for people to walk around the table when others are seated. If you plan on mounting a display to the wall, you should consider whether there is enough space to walk in front of the display, or if the display should be mounted to the table.

Maximum Number of People

How many people will be sitting and/or standing around the table? For larger meeting rooms, you should consider the maximum number of people intending to sit at the table. For smaller meeting rooms or huddle spaces, tables typically accommodate three to six people.

Technology Needs

Will you be installing a videoconferencing system or interactive display? Will you need access to power sources and network connections? Mobile devices and laptops are essentially portable workstations. Make sure your collaboration table can accommodate enough outlets and ports for everyone at the table, as well as conferencing technology.

Types of Finishes

Laminate finishes come in a wide selection of wood grains and colors. Select a laminate that matches the decor in the office, or choose a whiteboard finish to turn your table top into a brainstorming surface. Custom veneers and glass overlays can provide a more upscale appearance.

Designing the ideal conference room

The TEAM series of conference tables bring style and elegance to your meeting rooms. TEAMconference tables are available in a wide selection of shapes and sizes to fit small collaboration spaces or large boardrooms. Choose from quality laminate finishes or customize with select veneers to match your room design.

Select table tops with or without cutouts for power and a variety of table pedestals to fit your style and technology needs.

STANDARD TABLE TOPS

SHAPE		DIMENSIONS	SUGGESTED # PEDESTALS	SEATING	PART NUMBER

Innovative spaces for team collaboration

In today's mobile workplace, create innovative and inviting meeting areas for informal team meetings, small conference rooms and collaborative work spaces. The TEAMhuddle™ table collection brings ergonomic design to improve the meeting environment and increase productivity. With bar height tables, team members are eye level with the presenter, which improves communication and interaction with the team.

TEAMhuddle table tops are available in a wide variety of quality laminate finishes or custom veneers to match your room design.

Straight edging is provided with laminate finishes. Custom edging available in veneer finishes.

The teardrop- and guitar pick-shaped table tops are designed to provide clear line of site to a presenter or wall-mounted display.

Create the ultimate meeting space

Maximize small meeting rooms or huddle spaces by combining technology with furniture. TEAMspace™ collaboration tables provide an all-in-one workspace that are perfect for small team meetings. Our TEAMspace series offers a functional and stylish design for any work environment. From height adjustable capabilities to choice of finish, AVTEQ offers a variety of huddle solutions for collaborative team spaces. Available in a wide selection of laminate finishes.

DynamiQ TEAMspace™

The DynamiQ TEAMspace is a sleek sit-to-stand, height adjustable collaboration table. The universal display mount, which support a wide range of display sizes, can be mounted to the table.

TEAMspace™ Lite

TeamSpace™ Lite is a compact collaboration furniture solution. It's perfect for huddle rooms and other small office spaces. Work surface and display mount are included into a single unit, making installation a breeze. Collaboration and videoconferencing is casual and more convenient than ever!

Adjustable height camera shelf allows the camera position to be above or below the display. The universal display mount supports a wide range of display sizes.

Front access panel provides easy access to the internal storage and cable management features.

Wide variety of laminate finishes and choose black or silver powder coat metal frame. Finishes and frames are highly customizable.

TEAMspace™ Slim

TeamSpace™ Slim is a versatile furniture solution designed for corporate huddle rooms or collaborative learning environments. The TeamSpace™ Slim supports a single display and has integrated equipment and cable storage. It is highly customizable from size and shape of table top to finish options.

Choose from the standard options, or design your own custom huddle space to increase team productivity and add flexibility and style to any work environment.

Slide-out rack drawers with 4RU rack space on each side provide easy access to the audio visual equipment. Bolted rear privacy panel creates a stand-alone collaboration solution.

SPECIFICATIONS
