AVTEQ®

MOBILE AND ADAPTABLE SPACES
HYBRID MEETING ROOMS

Flexibility continues to be a key driver for bringing employees back to the office. Companies are repurposing workspaces to provide adaptable work environments that include movable furniture, mobile videoconferencing carts, and improved video and audio capabilities.

The return to the office also has brought more collaboration between the IT and facilities groups to ensure total room solutions. AVTEQ's mounting and furniture solutions add more opportunities for resellers to expand beyond AV technology and offer products that provide the flexibility companies want.

MOBILE CARTS & STANDS

AVTEQ offers over 20 different mobile carts and stands to provide the mobility needed in today's hybrid environments. Our carts support displays from 32-98 inches, PTZ cameras and video bars, codecs and meeting control panels -- everything you need for a Zoom Room or Microsoft Teams Room.

COLLABORATION TABLES

TEAMhuddle™ tables provide an inviting and functional area for informal team meetings, Zoom and Team rooms and other collaborative work spaces. TEAM tables seat 4-6 people or our TEAMconference tables can seat up to 14. Choose the table that best fits the collaborative space.

CAMERA & WALL MOUNTS

With the wide selection of video conferencing cameras and video bars, the viewing angle for remote workers are improved greatly. Mounting these solutions on AVTEQ carts allows remote workers to collaborate from any where in the room.

WEBEX ROOMS. TEAM ROOMS. ZOOM ROOMS.

Team meetings include both in-person and remote team members, so the design of the room should easily accommodate both groups. Employees also want the flexibility to use any office space for a meeting. Mobile collaboration carts that are video-enabled make it easy for teams to meet anywhere.

CISCO WEBEX ROOMS + AVTEQ

Bring mobility to your Webex Rooms with AVTEQ's certified mounting solutions. Our Webex Room Kit mounts are fully compatible with any of our mobile carts. Plus, our Room Navigator wall mounts provide the added security for any meeting space.
