

DynamiQ mMount II

Motorized Height Adjustable Mount

The DynamiQ mMount II provides height adjustable capabilities with a motorized wall mounting system. The double-column design provides the stability needed to work with large interactive touchscreens up to 98”.

The wired remote controller may be placed at a convenient and easy-to-reach location, allowing the user to adjust the height of the screen safely and quietly. The motorized mount has a dual anti-collision feature to prevent accidental pinching, when the system is moving and senses an obstruction it will stop and retreat. In its lowest position, the monitor allows easy access for users in wheelchairs.

A top-box design is located on the back of the VESA mounting box, which safely stores the electric controls.

The backside also may be used for a mini PC or other small equipment. With the optional accessories, the product may be equipped for use with a laptop or keyboard tray, teleconferencing equipment, camera, or sound bar.

FEATURES
